

## agilesWorkflow Now Available on Microsoft AppSource

agiles Informationssysteme GmbH today announced the availability of agilesWorkflow on [Microsoft AppSource](#), an online cloud marketplace providing tailored line-of-business solutions.

Enabling companies to focus on the essential – that’s the philosophy of agiles. The agilesWorkflow app allows companies to manage, simplify, prioritize and automate the tasks of employees, departments and management. The user-friendly application significantly simplifies the workday and enables all companies that use Microsoft Dynamics 365 Business Central to ease their complex processes. There is no individual development necessary and the agilesWorkflow app can be used with every table in Dynamics 365 Business Central. Moreover, it is compatible with all industry apps, be it our own solutions agilesFood and agilesTrade or software solutions from other providers. Users benefit from increased productivity through prioritization and automation of tasks. Save time, money and energy with the agilesWorkflow app!

“These last years have been characterized by an exponential technological growth,” said Christian Sega, managing director of the agiles Group. “The world is changing faster than ever, and I believe that applications will play a crucial role in the future. Therefore, I am very happy to announce that we have published our first app on Microsoft AppSource. This is an important milestone on our way to offering all of our software solutions in the modern client environment.”

Toby Bowers, General Manager, Business Applications Group, Microsoft Corp., said, “We’re happy to welcome agiles Informationssysteme GmbH to Microsoft AppSource, which gives our customers access to the best solutions available from our extensive partner ecosystem. Microsoft AppSource offers partner solutions such as agilesWorkflow to help customers meet their needs faster.”
