

Are your processes  
driving you crazy?

Put an end to this  
with agilesWorkflow.

[agilesWorkflow.com](http://agilesWorkflow.com)

Are you concerned  
about low productivity  
or a lack of overview?

## Rely on agilesWorkflow in the future

Your add-on for Microsoft Dynamics 365 Business Central & Microsoft Dynamics NAV – can be integrated into any kind of database. Affordable and easy to use – for more efficiency and effectiveness.

- No individual development necessary
- Can be used with every table in BC/NAV
- No changes of standard objects (own object number range)
- Simple setup by key user possible
- Ready for use in < 1 hour

## Workflows

- Representation of operational procedures based on various tasks. These are part of the workflow and therefore components of internal processes.

## Workflows within booking and release routines

- Routines can be interrupted if certain values in BC/NAV or workflows with corresponding tasks have not yet been created or edited.

## Example scenarios

Master data management

Order processing

Invoice approval

Claim handling

Inventory monitoring

Reminder of payment terms

Date monitoring  
e.g. for certificates,  
incoming goods

Project management

## Your advantages at a glance

- **Cost reduction**  
Automation and control prevent errors that could otherwise lead to additional costs.
- **Increase in productivity**  
Prioritization and automation of tasks for the user.
- **Fast response & real-time information**  
Notification via email and within BC/NAV about the current status of the tasks.
- **Flexibility**  
Flexible in setting up and changing processes.
- **User-friendly set-up**  
Setup guided by workflow wizards.
