

The ease of working

Deliver real value to your customers!

agilesWorkflow for Microsoft Dynamics 365 Business Central & Microsoft Dynamics NAV simplifies your customers' workdays when it comes to business process management and optimization. Fulfill your customers' workflow requirements and ease the complex business processes with one add-on.

Your benefits as a partner

- No individual development necessary
- Can be used with every table in BC/NAV
- No changes of standard objects (own object number range)

Benefits for your customers

- User-friendly set-up and interface
- Increase of productivity and saving of time
- Cost reduction through efficient processes

One product, different scenarios

Workflows with tasks

- Representation of operational procedures based on various tasks. These are part of the workflow and therefore components of internal processes.

Workflows within posting and release routines

- Routines can be interrupted if certain values in BC/NAV or workflows with corresponding tasks have not yet been created or edited.

Example scenarios

Master data management

Order processing

Invoice approval

Inventory monitoring

Reminder of payment terms

Claim handling

Date monitoring

Project management

agilesWorkflow at a glance

- **Cost reduction**
Automation and control prevent errors that could otherwise lead to additional costs.
- **Increase in productivity**
Prioritization and automation of tasks for the user.
- **Fast response & real-time information**
Notification via email and within BC/NAV about the current status of the tasks.
- **Flexibility**
Flexible in setting up and changing processes.
- **User-friendly set-up**
Set-up guided by workflow wizards.
